- ▶ Simple to install
- ▶ Quality sound
- ▶ Designed for 24/7 usage

Higher Quality Sound

Until recently directional speaker technology did not allow for high-quality sound and lacked low frequencies. With Spotphonics, the sound quality is comparable with standard speakers and is highly audible up to 20 meters away!

Reduced Noise Pollution

Spotphonics offers high-directionality speakers of an approximately 10 degree angle; an ideal solution to limit sound pollution.

Plug and Play

Our directional speakers are very easy to install: Everything is provided, and all that is needed is a power source and a line input.

Solid Build

Spotphonics products are designed for absolute reliability and for 24/7 operation. They are burn-tested and compliant with CE and ROHS requirements. A 2-year warranty is offered as standard.

Multiple Models

We now offer a choice of models to provide distinct solutions for various applications and budgets. Model features include wall-mounted, swivel-based, all-in-ready-to-go, and wide-reach.

Elegant Design

The refined aesthetic format of our products make them a sophisticated low-profile sound solution in their environment.

Surprise Effects!

Spotphonics directional speakers can be directed onto objects such as sculptures or paintings making them come alive with sound! This causes listeners to instinctively turn to look for the source - an extremely effective feature in digital signs or advertising.

Low Profile Speaker

The Spotphonics **STYLE** is a small, slim, and aesthetic speaker intended for discreet integration into ceilings or walls. It is used for confining sound to small areas in museums (information points) or in stores (advertising points).

The Spotphonics **POWERSTYLE** is a powerful, slim and aesthetic speaker intended for discreet integration into ceilings or walls. It is used for confining sound to target areas in museums, or in stores (advertising boards).

Broadcast your audio messages straight to your target audience and nowhere else! Spotphonics offers an innovative sound generation technology designed to target sound like a flashlight creating your virtual reality audio experience. Now you can seamlessly deliver your sound exactly where you want it!
